Hamza Alhaj

Full-stack software developer building commerce platforms, Saudi compliance integrations and business software. Experienced in designing, building and optimizing scalable web applications, with bilingual Arabic and English products in use today.

Technical Skills

- Frontend: HTML5, CSS3, Sass, Less, Tailwind CSS, JavaScript (ES6+), TypeScript, React.js, Next.js, Vite, responsive and RTL design
- Backend: Node.js, Express.js, NestJS, Fastify, .NET, REST APIs, WebSocket, background job queues
- Databases: MySQL, PostgreSQL, MongoDB, Redis, database design and optimization
- Mobile: React Native and Expo for cross-platform applications
- Platforms: nopCommerce, MedusaJS, MercurJS, Odoo
- Delivery: Docker, Coolify, Git, GitHub

Professional Experience

RTM Solutions, Saudi Arabia · Software Developer 2025 – Present
Worked on commerce platforms, compliance integrations and business software for clients.

- **Aleef Care** (aleefcare.com): Arabic-first pet care platform with branch booking, clinics, grooming, training courses and adoption.
- **Raneem Gifts**: flowers and gifts commerce platform combining a storefront, .NET backend, operations console and Expo mobile prototypes.
- **Retail Pro to ZATCA**: e-invoicing integration with invoice workflows, background processing, offline handling and reconciliation.
- **Prism to SFDA RSD**: medicine track-and-trace integration with service development, POS integration, GS1 scanning and reliable delivery.
- **RTM Accounting for Odoo**: custom Odoo 19 modules for financial reports, bank matching, assets, deferrals and budgets.
- **Company landing page**, which helped bring in new clients.

Contract Freelancer, technology company, Damascus
Helped build a dashboard to organize the workflow of electricity providers.

Data Power, Saudi Arabia (Remote) 2022
Worked with a startup delivering technology solutions to other companies, including a modern, responsive landing page.

Selected Projects

Hindam: my own feature-rich marketplace SaaS with a storefront, admin management and vendor management, built on open-source software and adaptable to market needs. **Won third place** in a local startup competition.

Occasion: headless nopCommerce storefront with phone OTP sign-in, full checkout, Arabic and English localization, and typed OpenAPI contracts.

Strata by GameReplays (strata.gamereplays.org): competitive statistics and league platform with over 2.1 million matches and 48,000 players.

Community

Mobadroon (2023): two-year community journey, taking part in activities, organizing meetings and sessions, and managing the team's social media account.
